- Web apps, e-commerce, enterprise software
- OpenAI GPT
- Web scraping, Bots, API integration

LANGUAGES

- English (Fluent)
- Urdu (Fluent)
- Hindi (Fluent)

PROFILE

Results-driven Software Engineer with over 3 years of experience in developing scalable web applications, automation solutions, and AI-powered tools using Python (Django/Flask), React.js, and Laravel. Adept at designing, implementing, and scaling full-stack solutions while ensuring high performance, security, and user experience. Passionate about transforming business challenges into innovative solutions using cloud technologies, AI, automation.

TECHNICAL SKILLS

- Programming Languages: Python, Java, C++, PHP, JavaScript, HTML5, CSS3
- Frameworks & Libraries: Django, Flask, Laravel, React.js, Tailwind CSS, HTMX
- Databases: MySQL, PostgreSQL, SQLite
- Web Scraping & Automation: Selenium, Scrapy, Playwright, Puppeteer
- DevOps & Tools: Docker, Git, GitHub, CI/CD, Redis
- Cloud Services: AWS (EC2, S3), Fly.io, Heroku
- Other Tools: OpenAI API, Stripe API, Google APIs, Third-party APIs

WORK EXPERIENCE

Upwork | USA

Jan 2024 - Present

Full-Stack Software Engineer

- Delivered end-to-end web development solutions with a focus on custom websites, e-commerce platforms, and AI automation.
- Leveraged Django, Flask, React.js, for developing secure, scalable applications.
- Integrated AI-powered features like chatbots and personalized recommendations using OpenAI GPT.
- Automated data extraction systems with Selenium, Playwright, and Scrapy.
- Integrated cloud solutions via AWS and Heroku for scalable deployments.
- Successfully completed 10+ SaaS projects, helping clients in industries like e-commerce, renewable energy, and AI tools.
- Achieved 5-star ratings on Upwork, with 300+ satisfied clients both locally and internationally.

Vortexed Technologies | Rawalpindi, Pakistan

March 2023 - Jan 2024

Full stack Developer

- Developed scalable Laravel applications and RESTful APIs for high-traffic websites.
- Optimized databases and automated deployment using CI/CD pipelines (GitHub Actions, Docker).
- Integrated third-party APIs (Stripe, Google Maps) and ensured compliance with security standards.

**Bachelor of Computer Sceince**

Virtual University of Pakistan

GPA: 3.2 / 4.0**PROJECTS****1. CRM System Development**

- Description: Developed a custom CRM system with Django to efficiently manage customer data and sales pipelines. Automated follow-up notifications via email and SMS.
- Technologies: Django, MySQL, JavaScript, Email/SMS Integration

2. Automated Web Scraping System

- Description: Designed an automated web scraping system using Playwright and Scrapy, enabling seamless data extraction from 500+ sources. The system minimizes manual intervention, enhancing data retrieval efficiency and accuracy.
- Technologies: Playwright, Scrapy, Python, Automation, Web Scraping

3. E-commerce Platform Development

- Description: Built a full-fledged eCommerce website using Django and React.js, providing features such as secure payment processing with Stripe integration and intuitive UI components for a seamless user experience.
- Technologies: Django, React.js, Stripe API, HTML, CSS, JavaScript, SQL

4. AI Chatbot Integration

- Description: Integrated OpenAI's GPT API into an existing customer support platform to develop an intelligent chatbot. This integration improved response times by 50%, significantly enhancing customer interaction and satisfaction.
- Technologies: OpenAI GPT API, Python, Chatbot, AI

5. Real-time Data Analytics Dashboard

- Description: Developed a real-time data analytics dashboard using Django, React.js, and WebSockets, providing instant insights into business metrics and enabling data-driven decision-making.
- Technologies: Django, React.js, WebSockets, JavaScript, Data Visualization
